Professional Summary

Enthusiastic and detail-oriented cybersecurity fresher with hands-on experience in threat detection, log analysis, Windows system hardening, and network traffic analysis. Completed 40+ practical labs on TryHackMe and multiple system-based security projects including Sysinternals process analysis, Wireshark traffic capture, etc. Strong foundation in Windows security, PowerShell scripting, and network protocols. Actively seeking an entry-level role in a SOC, Blue Team, or system security environment.

Technical Skills

Security Tools: Wireshark, Sysinternals, Microsoft Security Compliance Toolkit, TCPdump, Nmap

Operating Systems: Windows, Ubuntu (Basic), Command Line Proficiency

Scripting & Automation: PowerShell (Intermediate), Bash (Basic), JavaScript

Networking: TCP/IP, OSI Model, DNS, HTTP/S, ARP, Packet Capture

Monitoring & Hardening: Windows Event Viewer, Local Security Policy, Group Policy, BitLocker

Web Development: React.js, Node.js, Express.js, REST API, MongoDB

Professional Experience

Web Developer & AI Researcher

Aug 2020 – Mar 2024

CISAI (R&D division of Innspark Solutions) - India

- Developed UI for internal cybersecurity-focused platforms using React.js, HTML5, and CSS3.
- Built and secured RESTful APIs with Node.js and Express.js, incorporating JWT-based authentication.
- Worked with MongoDB and MySQL for secure and scalable data management.
- Implemented Git-based workflows and CI/CD pipelines for fast, stable deployments.
- Conducted applied research in ML, NLP, and AI integration for smart automation.

React.js Developer (Contract)

Oct 2024 - Dec 2024

Codepeak Technologies - India

- Built responsive, device-compatible UIs using React.js and integrated dynamic content via REST APIs.
- Improved performance and visibility through Lighthouse audits and SEO best practices.

Cybersecurity Projects & Labs

TryHackMe Cybersecurity Labs

- Completed over 40+ labs (rooms) focused on real-world cybersecurity skills.
 - Gained practical experience in reconnaissance, Linux, web security, and log analysis
- Key rooms:** Introduction to Cybersecurity, Network Fundamentals, Pre-Security, Threat Detection.

Windows Security Hardening Project

- Applied password, lockout, and audit policies via secpol.msc and gpedit.msc
 - Enabled BitLocker, Defender protection, and disabled unnecessary services
 - Wrote PowerShell scripts for auditing, firewall rules, and log collection
 - Verified system compliance using Microsoft Security Compliance Toolkit
- Tools :** Windows Security Policy, PowerShell, BitLocker, Group Policy

System Analysis Using Sysinternals

- Audited startup entries and validated signatures using Autoruns and Sigcheck
- Analyzed processes, memory usage, and network activity via Process Explorer & TCPView
- Established system behavior baseline with Procmon (Process Monitor)
- Identified suspicious patterns and documented findings

Tools: Sysinternals Suite (Autoruns, Process Explorer, Procmon, Sigcheck, TCPView)

Wireshark Network Traffic Analysis

- Captured and analyzed live packets to investigate TCP/IP and OSI layer protocols
- Filtered DNS, HTTP, and ARP traffic; flagged ARP spoofing attempts in LAN
- Logged headers and timestamps to correlate potential reconnaissance activity

Tools: Wireshark

Windows Event Log Monitoring and Analysis

- Configured Windows Security Auditing and Event Viewer to monitor key Event IDs (4624, 4625, 4720, 4672, 1102).
- Detected failed/successful logins, unauthorized account creation, and privilege escalation through log analysis.

Tools: Event Viewer, PowerShell

Education

Master of Computer Application (MCA)	2018 - 2020
Amrita Vishwa Vidyapeetham, India CGPA: 8.38/10	
Bachelor of Computer Application (BCA)	2015 - 2018
Amrita Vishwa Vidyapeetham, India CGPA: 7.42/10	

Certifications

Pre-Security Learning Path - TryHackMe	June 2025
Covered fundamentals of reconnaissance, Linux basics, web security, and cyber kill chain basics.	
Introduction to Cybersecurity - Cisco Networking Academy	June 2025
Introduction to Cybersecurity, June 2025 Learned about cyber threats, attack types, CIA triad, and modern defensive strategies.
